Education

National Institute of Technology Raipur

Bachelor of Technology - Biotechnology (CGPA-8.17/10)

July 2024–May 2028

Raipur, Chhatisgarh

Experience

Infotact Solutions

Jan 2026–March 2026

Software Engineer Intern

Remote

- Developed an AI-powered campaign generation platform using modern web technologies, enabling automated creation of marketing and social media content.
- Engineered a RAG chatbot in MERN by combining document retrieval and LLM-based response generation for context-aware question answering
- Integrated frontend and backend services, ensuring efficient data flow and a responsive user experience. Collaborated in a team-based development environment using Git/GitHub for version control and feature management.
- Debugged and optimized application components, improving maintainability and overall system performance.

GirlScript Summer of Code (GSSoC) 2026

May 2026 – Present

Open Source Contributor

Remote

- Contributed to multiple open-source projects by resolving bugs, implementing UI/UX improvements, and enhancing accessibility features.
- Successfully merged 15+ pull requests across various repositories, collaborating with maintainers through code reviews and issue discussions.
- Improved responsive design, dark mode compatibility, and frontend functionality using HTML, CSS, JavaScript, React, Git, and GitHub.
- Worked in a distributed open-source environment, following industry-standard workflows including branching, pull requests, and version control practices.

Projects

MeetSync | *React.js, Node.js, WebRTC, Socket.IO* | *GitHub* | *Live Demo*

June 2026

- Developed a Zoom-inspired video conferencing app supporting up to 10 concurrent peers per room using WebRTC for real-time P2P audio/video communication with sub-second connection establishment.
- Engineered complete WebRTC signaling pipeline — SDP negotiation, ICE candidate exchange, and STUN/TURN server integration for reliable cross-network connectivity across NAT/firewall environments.
- Implemented Socket.IO-based signaling server on Node.js/Express handling room lifecycle, participant management, and real-time event orchestration
- Designed responsive React UI with live controls for mic, camera, and participant interactions; deployed frontend on Vercel and signaling backend on Render.

WonderLust | *MERN Stack, Cloudinary, MVC* | *GitHub* | *Live Demo*

Feb 2026

- Engineered a full-stack rental marketplace application using MongoDB, Express.js, React.js, and Node.js, supporting end-to-end property listing and management workflows.
- Architected the application using the MVC design pattern, improving code organization, maintainability, and separation of concerns.
- Integrated Cloudinary-based media management for image uploads, storage, and delivery of property listing assets.
- Developed secure authentication and authorization mechanisms with role-based access control and protected routes.
- Designed RESTful APIs and optimized MongoDB data models for efficient retrieval and management of listing information.
- Implemented responsive UI components and client-side validation to provide a seamless user experience across devices.

Technical Skills

Languages: Python, Java, C, HTML/CSS, JavaScript

Developer Tools: VS Code, Git and Github

Database: MongoDB , SQL

Frameworks: ReactJS, ExpressJS, NodeJS, WebRTC, Socket.IO, REST APIs

Core CS: Data Structures and Algorithms, OOPS, DBMS, OS, Computer Networks

Leadership

Internshala

Oct 2025–Dec 2025

Student Partner Internshala

Remote

- Represented Internshala on campus and promoted internship, training, and career development opportunities among students.
- Conducted outreach initiatives and increased student engagement through online and offline campaigns.
- Developed leadership, communication, networking, and community-building skills by coordinating with students and program teams.

Achievements

- Solved 300+ Data Structures and Algorithms problems on LeetCode and other coding platforms.
- Successfully merged 15+ pull requests across different open-source repositories during GirlScript Summer of Code (GSSoC) 2026.
- Selected for a Software Engineering Internship at Infotact Solutions, contributing to AI-powered web applications and RAG-based chatbot development.
